ABOUT ME

Detail-oriented and proactive Quality Assurance professional, currently working as a Graphics Software Development Intern at Intel. Experienced in manual software testing and validation, with hands-on involvement in executing automated test cases using tools like Cypress and NUnit. Skilled in setting up validation platforms, analyzing results, and supporting the QA process in cross-functional teams. Outside of validation work, I have a strong passion for web development – building responsive, user-friendly applications using modern technologies such as React, Tailwind CSS, and Next.js. I continuously strive to improve both software quality and user experience through careful testing and clean frontend design.

EXPERIENCE

intel

Intel Corporation

07.2025-Now

GRAPHICS SOFTWARE DEVELOPMENT

Internship

Planning future validation workstations, making orders, logging workstations into database.

intel

Experis for
Intel Corporation
